VOLCANO TO GO

Help Tabitha and Tina use the mind-blowing science of soda and mints to take down a baby gone rogue! This is gonna get messy, so make sure you do it outside in a yard or a park.

SUPPLIES

- One 2 liter bottle of dark colored soda (like rootbeer or cola)
- One Mentos
- A flat-bottom container or tub
- Goggles or safety glasses
- A parent or trusted adult

DIRECTIONS

1. First, put your flat-bottom container on a flat surface and put your bottle of soda next to it.
2. Then, keep yourself safe by putting on your safety goggles. This next part happens very quickly, so it's important to be safe.
3. Now, carefully open the soda bottle and grab one mint. All it takes is one mint! Count down from 3, then plop the mint into the bottle. Quickly take a few steps back and watch it explode into the sky!

SCIENCE BEHIND THE MESS

Soda has carbon dioxide in it, giving it those famous bubbles. The mint has baking soda in it, which produces even more carbon dioxide bubbles when you drop it into the soda! As the mint sinks into the soda, those bubbles start to rise and mix with the soda's carbon dioxide. This causes WAY more carbon dioxide creation, and WAY more rising bubbles. Since all of this happens so fast, the bubbles have nowhere to go but up, causing the eruption! SPARKLIEST GLITTERIEST TIARA YOU'VE EVER SEEN

Let's create your own "Sparkliest Glitteriest Tiara You've Ever Seen" like the one worn by Precious Templeton in the all-new short, *Precious Templeton: A Pony Tale*.*

YOU WILL NEED:

- 1 piece of paper (any color)
- scissors
- glitter
- liquid glue
- paintbrush
- pencil with eraser
- newspaper (or any scrap paper)
- stapler

STEP 1:

Let's make your own Sparkliest Glitteriest Crown You've Ever Seen! Get a blank piece of 8.5" x 11" paper and fold it half the long way. Thicker paper would be best.

STEP 2:

Draw the outline of your dream crown on one side of the sheet of paper, leaving a one-inch border all the way around. Make sure the dips and points are above the one-inch border.

STEP 3:

Carefully cut out the crown outline you just made. Make sure you cut through both sheets of the folded paper. You should have two equal halves of crown now!

STEP 4:

It's time to staple! Overlap an edge of one half of the crown with the edge of the other half. Staple them together! But, don't staple the other side just yet.

SPARKLIEST GLITTERIEST CROWN YOU'VE EVER SEEN

STEP 5:

Put down some scrap paper for this next part or it's gonna get sticky! Place your crown on top. Squeeze liquid glue all over one side of your crown and spread it around with a paintbrush.

STEP 6:

Glitter it up! Dust as much glitter as you want all over the crown. Do it quickly, before the glue dries. Spread the glitter around to cover the whole crown. Wait for at least 15 minutes for the glue to dry.

Once the glue is dry, lift up your crown and shake the excess glitter off. If it's not glittery enough for you yet, repeat the glueing and glittering process until it sparkles as much as you want! Make sure the glitter crown is dry before you repeat the process.

STEP 7:

Now that your crown is sparkly and shining, loop it into a circle and staple the remaining ends shut.

STEP 8:

TA-DA!

The Sparkliest Glitteriest Crown You've Ever Seen is all yours! Wear it like a BOSS and Watch the all-new short, *Precious Templeton: A Pony Tale**
